Using Digital Technology to Simplify Implant Restorations

Presented by
Dr. Mark Ludlow
Wayne Burrell, CDT

Thursday, October 12, 2017
Johns Creek, GA

Co-sponsored by

Using Digital Technology to Simplify Implant Restorations

This seminar will provide a comprehensive overview of intraoral scanning with specific emphasis on its use with implant dentistry. Clinical and laboratory protocols will be reviewed that focus on prosthodontically driven processes that create precise and predictable treatment outcomes. A review and comparison of the conventional implant restorative workflow to one that implements digital technology will be explored. Please join us to learn what your future can hold with the flexibility and simplicity of intraoral scanning.

At the completion of this course, participants will be able to:

- Understand how digital technology allows the restorative doctor to receive a custom CAD/CAM abutment and final crown without having to take an impression or make a temporary.
- Understand how the use of an intraoral scanner in conjunction with a scan body can streamline and simplify the implant restorative workflow.
- Familiarize yourself with the different scanners which are currently on the market and be able to assess which one may be the best fit for your practice.
- Discuss how implementing digital technology as part of your restorative technique can decrease patient visits and reduce chairtime.

Program at a glance

Date	Thursday, October 12, 2017	
Time	5:30 - 6:00 pm	<i>Registration and refreshments</i>
	6:00 - 9:00 pm	<i>Lecture presentation</i>

Featured speakers

Dr. Mark Ludlow is the Division Director of Implant Prosthodontics and Assistant Professor at the College of Dental Medicine at the Medical University of South Carolina. He completed his DMD dental training at the University of Connecticut and received his MS in

prosthodontics from the University of North Carolina. Dr. Ludlow has been involved in various research projects along with product development and alpha/beta testing with numerous dental companies and implant manufacturers. He has lectured nationally on a variety of topics involving surgical implant placement and restoration, guided implant surgery, digital dentistry, and fixed prosthodontics. As a practicing and teaching prosthodontist, Dr. Ludlow's passion is in the development and integration of digital technology in the practice of everyday implant and restorative dentistry.

Wayne Burrell, CDT, has been with Gibson Dental Designs since 1987. He began his career in 1981, and worked as a partner in a small dental lab under the guidance and tutelage of an experienced dentist in both crown and bridge, as well

as production and design. Wayne serves as the lab manager for all things porcelain, and will present an implant case work flow from start to finish in the lab.

The participation of this speaker has been made possible through support from Dentsply Sirona Implants.
